DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

Claim Objections

2. Claim 26 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 1.

When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP 706.03(k).

Allowable Subject Matter

3. Claims 1-25 are allowed.

4. The following is an examiner's statement of reasons for allowance:

In claim 1, the patentability, at least in part, is a combination of: "*a method for forming a CMOS well structure, comprising: forming a plurality of first conductivity type wells over the substrate, each of the plurality of first conductivity type wells is formed by filling respective openings in the first mask with first conductivity type material; removing the first mask; and forming a plurality of second conductivity type wells over the substrate, each of the plurality of second conductivity type wells is formed by filling spaces between respective first conductivity type wells with second conductivity type material*"; and in the combination with other claimed limitations

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
